

## Discover the Cashmaster One Max™ Best in Class

With more than 25 years' experience in cash counting equipment, the Cashmaster One Max™ was launched in 2016 and brings a proven track record in robustness and reliability and is widely viewed as the most advanced and intuitive device available.

- In tests, the Cashmaster One Max™ counts 50% faster than comparable count-by-weight technology.
- Store your counts in internal memory, review historical data and generate reports – all without the need for external tools or cloud services.
- No wires – optional Printer One clicks neatly into the base of the device.
- Fully customizable software to standardize and control your cash management procedures.
- Tough, durable 5.0” color touchscreen glass with anti-glare, to withstand even the harshest environments.
- POS and back-office integration capabilities to automate and streamline data flow and improve cash visibility.

*“The Cashmaster One Max has significantly reduced the time we spend counting cash, preparing floats and organizing pick ups. It also makes count data preparation and transfer so much easier and quicker, and the device contributes greatly to our wider loss prevention procedures.”*
